

Perbaikan Muei utr Dairpro

3. Mofari Algo direct + Flowchart

Source Code

```
int x = 20;
if (x % 2 == 1) {
    while (x <= 35) {
        cout << x << endl;
    }
    x++;
}
```

Flowchart

Mofasi Algoritma

1) Judul = Program direct ganjil

2) korus = $x = \text{Integer} \leftarrow 20$

ls : $x \leftarrow 20$

fs : $x \leq 35$

Output (x)

3) Algoritma : Repeat until

($x \leq 35$)

if ($x \bmod 2 == 1$) then

output (x)

x++

end

4. Menisci algo + flowchart Faktorial

Source Code

```
int x, hasil = 1, i = 1;
```

```
cout << "Faktorial dari : ";
```

```
cin >> x;
```

```
do {
```

```
    hasil = hasil * i;
```

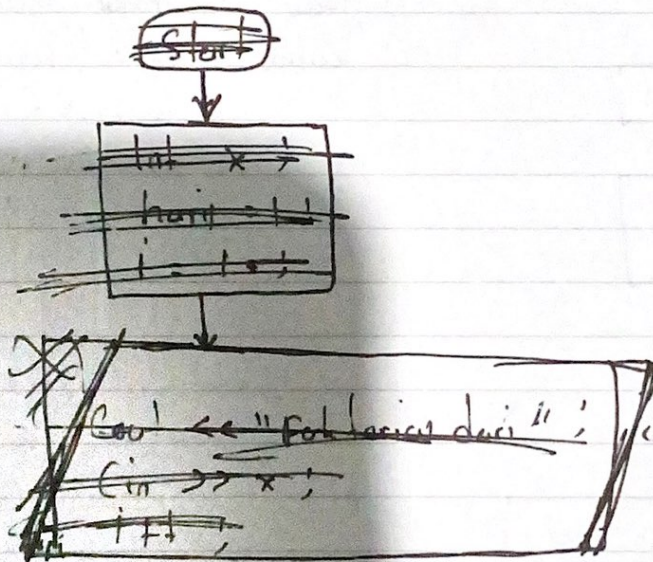

```
    i++;
```

```
} while (i <= x);
```

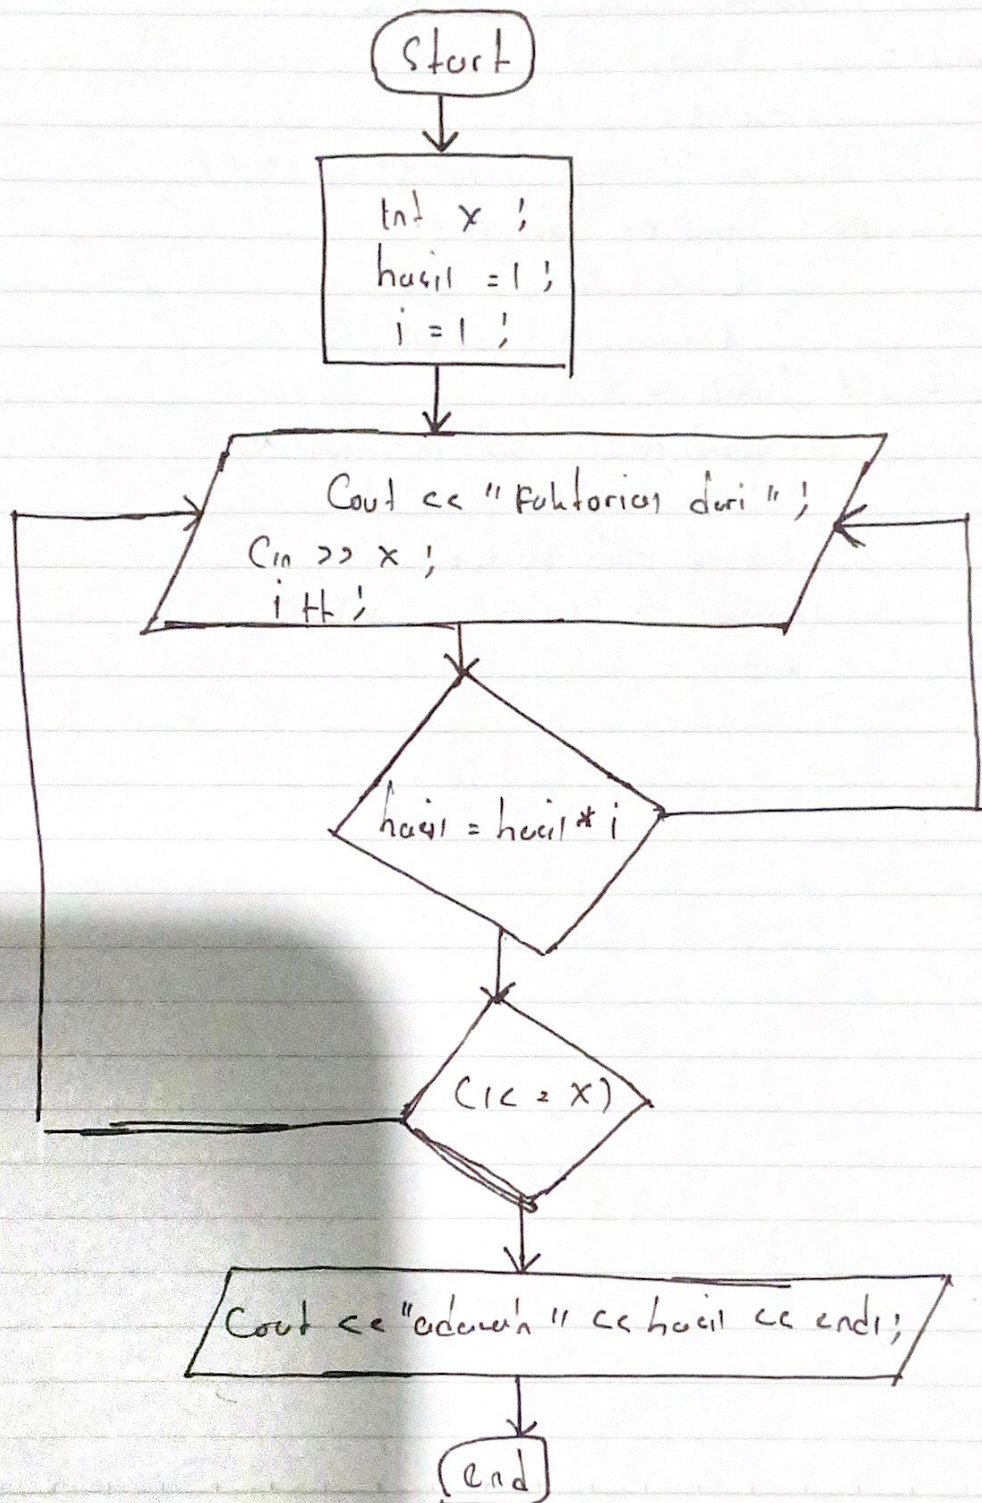

```
cout << "adaah " << hasil << endl;
```

```
for
```

```
Flowchart
```

Flowchart

Notasi algoritma

1) Judul : Program Menghitung Faktorial

2) Kemas : x , hasil : Integer

hasil $\leftarrow 1$, $i \leftarrow 1$

Is : x : Integer, hasil $\leftarrow 1$, $i \leftarrow 1$

fs : hasil \leftarrow hasil $\times i$

($i \leq x$)

Output \leftarrow "cetak" (x)

3) Algoritma : Input $\leftarrow x$

Repeat until hasil \leftarrow hasil $\times i$
 $i++$;

Repeat until ($i \leq x$)

Output \leftarrow "cetak" (x)

end
